DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because legal phraseology such "disclosed" should not be used. Correction is required. See MPEP § 608.01(b).

Allowable Subject Matter

3. Claims 1-8 and 15-21 allowed.
4. Claims 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2654

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 9-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Petkovic et al., Patent No. 6,185,527 (filed Jan. 19, 1999).

As per claim 9, Petkovic et al. disclose a method of operating a multimedia storage device player system, (see col. 6, lines 31-40) comprising:

converting an audio input to a digitized representation of the input sample, (see Fig. 2, block 30);

locating a matching audio segment within audio data stored on a storage device, wherein a digitized representation of the audio segment and the digitized representation of the input sample satisfy match criteria, (see col. 13, lines 38-55).

As per claim 10, Petkovic et al. disclose a method comprising advancing the storage device to the location of matching audio segment, (see Fig. 15).

As per claims 11-12, Petkovic et al. disclose a method transforming the input sample to a frequency domain representation of the input sample and transforming a portion of the audio data to a frequency domain representation of the portion ..., (see Fig. 13).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
